

UF Department of Urology Mission, Vision and Core Values

Mission Statement

The mission of UF Department of Urology is to provide:

- consistent, timely, compassionate, and exceptional patient-centered care by all members of our health care team, focused on achieving an optimal outcome and patient experience
- a stimulating environment for learners to explore and grow in their comprehension of broad subspecialty urologic training
- transformative research solutions to common as well as complex urologic problems and condition

Vision Statement

The vision of UF Department of Urology is to:

- be recognized as the premier Urology Department for patient care, research, and education by:
- providing world-class subspecialty urologic care with the utmost respect and compassion for each individual's condition and circumstance
- capitalizing on multidisciplinary processes and use of advanced technologies to analyze and address even the most complex of urologic diseases and conditions
- incorporating innovative educational programs to provide comprehensive urologic training and expertise and inspire the next generation of urologic leaders in the field
- critically addressing current and future challenges in the field of urology through creative and collaborative research design and implementation to transform the care of patients both present and in the future
- collaborating within the UF Health system and across the region and state to establish best practices and address health care disparities in the care of all urologic patients
